# OpenCart

# INTRODUCTION:

## OPENCART:

---

OpenCart is free open source e-commerce platform for online merchants. OpenCart provides a professional and reliable foundation from which to build a successful online store. This foundation appeals to a wide variety of users; ranging from seasoned web developers looking for a user-friendly interface to use, to shop owners just launching their business online for the first time. OpenCart has an extensive amount of features that gives you a strong hold over the customization of your store. With OpenCart's tools, you can help your online shop live up to its fullest potential.

## SYSTEM REQUIREMENTS:

OpenCart has certain technical requirements for the software to operate properly. The software must be uploaded to a web server, which will make the store publicly available on the web. If you do not already have a domain or web hosting account, those can easily be purchased for an affordable price at various places online.

When selecting a hosting service, an Apache server is recommended. You will also need a database server that supports MySQLi, PDO, or PostgreSQL. (MySQLi is recommended if possible.) Finally, you will need to have the following PHP libraries installed in your PHP configuration:

- PHP 8.0 or later
- Curl
- GD Library
- Iconv
- Mbstring
- OpenSSL Encrypt
- ZipArchive
- Zlib

Additionally, you will want to turn on the following PHP settings:

- file\_uploads
- magic\_quotes\_gpc
- register\_globals
- session\_auto\_start

During the OpenCart installation process it will check to make sure you have those libraries and settings enabled. Typically they are already enabled by default with most hosting providers. However, if you receive an error warning during installation that one of them is not active, you should contact your hosting provider and ask them to add it to your PHP configuration.

## **OPENCART FRONTEND:**

This Document is intended to be used as an introduction to the OpenCart default store front. The store front reveals how the customer views and interacts with the store.

## NAVIGATING THE SHOP:

The OpenCart default theme makes navigating a shop's products easily accessible to its customers.

### HOME PAGE:

\* NOTE\*: in this word Document requirement marked in yellow Highlighter

The **home page** is arguably the most important page in the shop, in terms of presentation. In most cases, this will be the first page that a customer interacts with (especially if they are directed to the store site from a search engine). The shop's homepage needs to be user-friendly, while at the same time highlighting the shop's products.

The first step in becoming familiar with the store front is understanding the anatomy of the OpenCart default homepage.

### THE HEADER:

The header will be displayed at the top of the page, on every page of the store; not just the home page.

\* (This is mock Screen/Dummy Screen)

The header has the following navigation options:

- **Store logo:** Clicking on this logo will direct the customer back to the home page of the store.
- **Currency block:** The customer can select which currency the store's products will be in by clicking on any of the currency icons.
- **Shopping Cart:** Displays the number of items purchased, and the total price of the order. Clicking on the button will contain all of products added to the cart and an option to "View Cart" or "Checkout".
- **Search box:** The customers can type in the search box to search for a product within the store's product categories.
- **Links:** Links the customer to the Home page, Wish List, My Account, Shopping Cart, and Checkout.
- **Telephone:** Company telephone number.
- **My Account:** Customer can register or login from here.

## THE TOP MENU:

The top menu category only displays the top parent categories of products.

See [Categories](#) for more information on how to create and assign product categories.

Like the header, the top menu will be displayed on every page. When the customer's mouse is dragged over a category, a drop down menu will display the sub-categories for that parent category.

When a parent category is clicked, the customer will be directed to the category page, which displays all the products within that category.

## SLIDESHOW:

The slideshow displays several product banners of your choice by alternating the images in a slideshow. After a certain amount of time, one banner will shift to the next banner. Banners in this slideshow are useful for highlighting certain products to be easily accessible by the customer. When the banner is clicked on, the customer will be directed to the product on the banner's page.

Unlike the top menu and header, the slideshow in the OpenCart default can only be viewed on the home page in this position.

## FEATURED PRODUCTS:

OpenCart gives you the option of featuring specific products of their choosing on the home page.

## Featured

The **Featured** section includes the **product image, name, price; and an option to add the product directly to the Shopping Cart.**

## FOOTER:

The footer is **Must** located at the **bottom** of every page, not just the Home Page. This **block of miscellaneous links** is useful in **sorting relevant pages for the customer** that may not logically sort anywhere else.

The organizational scheme of the footer can be divided into the following sections:

- Information:** "About Us", "Delivery Information", "Privacy Policy", "Terms & Conditions"
- Customer Service:** "Contact Us", "Returns", "Site Map"
- Extras:** "Brands", "Gift Vouchers", "Affiliates", "Specials"
- My Account:** "My Account", "Order History", "Wish List", "Newsletter"

## PRODUCT PAGES:

The **OpenCart default product page** will follow the **structural format** seen below.

**Description** **Specification** **Reviews (0)**

**Intel Core 2 Duo processor**  
Powered by an Intel Core 2 Duo processor at speeds up to 2.16GHz, the new MacBook is the fastest ever.

**1GB memory, larger hard drives**  
The new MacBook now comes with 1GB of memory standard and larger hard drives for the entire line perfect for running more of your favorite applications and storing growing media collections.

**Sleek, 1.08-inch-thin design**  
MacBook makes it easy to hit the road thanks to its tough polycarbonate case, built-in wireless technologies, and innovative MagSafe Power Adapter that releases automatically if someone accidentally trips on the cord.

**Built-in iSight camera**  
Right out of the box, you can have a video chat with friends or family, record a video at your desk, or take fun pictures with Photo Booth

The product page can be divided into the following sections:

- **Product image:** The product image can be displayed under the title on the left-side, along with alternate views of the product underneath it in smaller box. Clicking on the main image will expand the image within the window for the customer to see it in greater detail.
- **Product details:** The product code, availability, and price are displayed just right to the product image.
- **Cart:** The customer can select a quantity and add the product to their cart, wishlist, or compare.
- **Rating/Sharing:** Underneath the cart can rate the product and/or share the product on different social media websites.
- **Description tab:** An area underneath the main product information to provide a detailed description of the product.
- **Review tab:** An area for the customer to write a review on the product.

## CATEGORY PRODUCT LISTINGS:

Category product listings enable customers to browse products similar to other products within the same category. This is especially helpful for customers looking to compare products, a feature that will be explained under Categories. The category page can be accessed a number of ways. It can be accessed from the top menu, when a customer clicks on one of the parent categories. Also, on product pages a customer can access the category product listing page by clicking on a category on the left side category block.

The screenshot shows a category product listing page for 'Desktops'. At the top, there's a navigation bar with links for Desktops, Laptops & Notebooks, Components, Tablets, Software, Phones & PDAs, Cameras, and MP3 Players. Below the navigation is a breadcrumb trail showing the path: Home > Desktops. The main content area has a sidebar on the left listing sub-categories: Desktops (13) (with options for PC (0) and Mac (1)), Laptops & Notebooks (5), Components (2), Tablets (1), Software (0), Phones & PDAs (3), Cameras (2), and MP3 Players (4). The main content area features a title 'Desktops' with a description placeholder 'Example of category description text' and a thumbnail image of a desktop computer. Below this is a 'Refine Search' section with a grid view icon selected. To the right are buttons for 'Product Compare (0)', 'Sort By: Default', and 'Show: 15'. The main grid displays three products: 'Apple Cinema 30'' (a large monitor), 'Canon EOS 5D' (a camera), and 'HP LP3065' (a laptop). Each product card includes an image, the product name, a brief description, price (\$110.00-\$122.00), tax information (Ex Tax: \$90.00, \$98.00-\$122.00, Ex Tax: \$80.00), and 'ADD TO CART' buttons. Below the main grid are two more product cards: a smartphone and a tablet.

As seen above, the category block is displayed on the left-side like it is in the product page. There is space under the Category title at the top to add a description to the category. The "Refine Search" links to sub-categories of that category for the user to browse. The products can be displayed according to the customer's preference: in a list or grid. The above image is sorted in the listing format. The products can be sorted according to name, price, rating, or model in

the "Sort By" box. The number of products displayed in the product listing can be changed in "Show" from 15 up to 100.

There is a section that gives space for each of the products within the category, providing a product image, description, price, and an Add to Cart option. There is an option to add the product to a wish list. Another option for the product is to "Add to Compare".

## PRODUCT COMPARE:

The "Add to Compare" feature in the product section allows the customer to compare the different specifications, features, and price of a number of products s/he might be interested in.

### Product Comparison

| Product Details        |   |   |
|------------------------|---|---|
| Product                | MacBook   | MacBook Air   |

[Continue Shopping](#) [Checkout](#)

The shopping cart gives an overview of the product selected by including the categories "Image", "Product Name", "Model", "Quantity", "Unit Price", and "Total". The customer has an option to add a coupon code or gift voucher, or estimate shipping & taxes, before heading to the checkout. The "Continue Shopping" button links back to the homepage.

## CREATING AN ACCOUNT:

Before a customer can continue checking out a product from the shopping cart, the customer needs to select either guest checkout or log into their account. The guest checkout doesn't require log-in details. Returning customers may want to make an account with the store.

There are a few ways a customer can make an account:

**1. Checkout**

**New Customer**

Checkout Options:

Register Account  
 Guest Checkout

By creating an account you will be able to shop faster, be up to date on an order's status, and keep track of the orders you have previously made.

**Returning Customer**

I am a returning customer

E-Mail

Password

[Forgotten Password](#)

**Login**

Step 2: Account & Billing Details

Step 3: Delivery Details

Step 4: Delivery Method

Step 5: Payment Method

Step 6: Confirm Order

Step 1 of the check out process allows the user to make an account before continuing with payment. Selecting "Register Account" will change Step 2 of checkout from Billing to Account & Billing details. Account & Billing asks for the same personal details as Billing, except that it asks for the user to create a password for their account. After Step 2 is completed, the customer may continue with the checkout process.

**2. Header- "My Account"**

Clicking "My Account" in the header will show the option for customer to the Login or create account. This page gives the customer an option to log in if they already have an account, or create a new account. In the "New Customer" section the customer can click "Continue" under Register Account to be directed to the "Register an Account" page.

# CHECKOUT:

Once a product has been added to the cart, the customer can continue to the checkout to make their product purchase. The Checkout page can be accessed in the header section of every page (found under the search box). Customer checkout using OpenCart is a simple process that can be completed in 6 steps.

## 1. Step 1: Checkout options

The customer can log into or register their account (as explained above), or select guest checkout.

## 2. Step 2: Billing details

Personal details including "First Name", "Last Name", "E-mail", and "Telephone" are filled into a form. It also requires the customer's address details.

## 3. Step 3: Delivery details

In Billing Details, the user can check a box to indicate that the delivery details and billing details are the same. This will cause it to skip over this step to Delivery Method. If the delivery details are different from the billing details the customer can enter this information in a form in this section.

## 4. Step 4: Delivery method

A method of shipping is selected here. A comment box is added for the customer to add comments about their order.

## 5. Step 5: Payment method

The customer selects their method of payment here and may add comments in the comment box.

## 6. Step 6: Confirm order

In this last step, the customer will see an overview of their purchase; including the product description, quantity, and price (with tax & shipping).
