- Prepare Test Plan
- Create Test Scenario Create Test Cases
- Test Environment Setup
- Build Deployment
- Test Execution
- Bug Reporting & Tracking
- Sanity Testing, Re-Testing, Regression Testing
- Test Phase Sign Off

**In every Ecommerce Application we perform following activities:**

- Login to application
- search the product
- add product to wishlist
- add product to cart
- make payment
- return the product

### **❖ Parts of Ecommerce application:**

- Frontend users/public access through internet
- Backend - access by admin in their environment through intranet

internet means access by public through internet

intranet means which is access only within organization (which is not access by public)
